PALKKODA OÜ

Solid timber wholesale prices

Fine-sawn spruce and pine solid timber beams and four-sided planed timber. Indicative wholesale prices, EUR excluding VAT. EXW Pärnu County, Estonia. Final prices and production availability are confirmed for each order.

Fine-sawn beams and planed timber

Large cross-sections are supplied **fine-sawn**; four-sided planing is not promised for these sizes. The Unimat 23E accepts input blanks up to 230 × 140 mm (width × thickness). Sufficient machining allowance must remain to achieve the finished size.

Production and order confirmation

Winter-harvested sawlogs are preferred as raw material. Oversized blanks are air-dried and sawn to finished size after stabilising. Curvature and surface cracks are corrected where possible. The finished surface is fine-sawn.

Moisture range, straightness, dimensional tolerances, visible-surface quality and intended use are agreed for each order. Knots, colour variation, the pith and drying cracks are natural features of solid timber. This price list does not certify a strength class or structural suitability.

Payment: 50% on order confirmation, 50% before dispatch. Lead time and availability are confirmed in the quotation.

300 × 300	680	61.20

Four-sided planed spruce and pine

Finished dimensions: width × thickness. Production requires an input blank no larger than 230 × 140 mm, with sufficient machining allowance. Lengths: 3000-6000 mm in 300 mm increments, subject to order confirmation.

Finished size, mm	Spruce €/m³	Spruce €/linear m	Pine €/m³	Pine €/linear m
95 × 70	860	5.72	905	6.02
145 × 70	765	7.76	810	8.22
195 × 70	725	9.90	770	10.51
220 × 70	775	11.94	825	12.71
95 × 95	790	7.13	835	7.54
145 × 95	715	9.85	760	10.47
195 × 95	685	12.69	725	13.43
220 × 95	735	15.36	780	16.30

The price includes the oversized blank, four-sided planing and standard setup. Volume is calculated from the finished dimensions. For less than 500 linear metres per cross-section, a €90 setup charge applies. Profiles, chamfers and special surfaces are quoted separately.

145 × 145, 145 × 195 and 145 × 220 mm are not offered as four-sided planed timber on this machine. Larger beams are supplied fine-sawn.

Lengths and delivery terms

The following length surcharges apply to fine-sawn timber. Availability and pricing of planed timber over 6000 mm require a separate technical agreement.

Length, mm	Spruce	Pine
3000-6000	Base price	Base price
6300-6900	+8%	+10%
7200-7500	+13%	+16%
7800-8000	+18%	+22%

Fine-sawn members over 6000 mm are made to order, up to 8000 mm. The exception for 300 × 300 mm remains a maximum length of 4200 mm. Exact dimensions and availability are confirmed for each order.

Available by agreement at extra cost: selection for appearance quality, numbering, photographs, measurement reports and export packaging meeting the agreed requirements. Transport, customs clearance and export documentation are not included. Load volume is calculated for each order.

Prices per linear metre are calculated from the published cubic-metre price: width × thickness / 1,000,000 × €/m³, rounded to two decimal places. The invoicing basis and final terms are confirmed in the quotation.
